SUMMARY

Software Engineer with more than 4 years of experience building scalable applications across web, mobile, and cloud platforms. Strong problem-solving skills with expertise in full-stack development, DevOps, AI/GenAI integration, and system architecture, delivering high-impact solutions across fintech, health tech, and travel tech domains.

EXPERIENCE

Senior Software Engineer

Apr. 2025 – Present

AHOY

Remote

- Leading development of Al Rais's cross-platform mobile app using React Native, building core modules including hotels, flights, activities, bookings, cart, and account with end-to-end RESTful API integrations
- Architected serverless backend infrastructure on AWS for Al Rais, defining and deploying Lambda functions to handle core business logic and API workloads
- Led TradeSocial platform development, built cross-platform React Native mobile app from scratch and modernized the legacy web app, reducing technical debt by 40%
- Drove UI/UX modernization initiatives across the platform, increasing user satisfaction by 30% and reducing interaction friction by 25%
- Conduct technical interviews for MERN and React Native roles; mentor junior developers across frontend and backend teams

Software Engineer

Nov. 2024 – May 2025

Centrox AI

Islamabad, Pakistan (Hybrid)

- Led development of CreditBase platform using Next.js and TypeScript, integrating LLM-powered document parsing with the Anthropic Claude API to analyze and compare complex legal documents 60% faster
- Delivered 4+ features for Pocket Mate AI mental health app, leveraging OpenAI API and prompt engineering to enhance conversational performance and user experience for 500+ daily active users
- Integrated RESTful APIs and fixed 40+ critical bugs across Next.js, NestJS, and MongoDB stack, increasing system uptime to 99.2% and reducing latency by 35%

Associate Software Engineer

Dec. 2023 – Mar. 2024

Ephlux

Karachi, Pakistan (Hybrid)

- Maintained Swift no-code platform for 4,000+ enterprise users using React, Node.js, and Express.js, enhancing 5+ modules and improving UI load time by 35%
- Resolved 20+ complex platform issues across bi-weekly sprints, reducing ticket resolution time by 50%

Junior Full Stack Developer

Sep. 2021 – Oct. 2023

IANCON

Remote

- Developed buyer and seller consoles for Noonhut's multi-vendor food delivery marketplace using React, enabling 100+ vendors to process 500+ daily orders
- Implemented Firebase authentication and real-time database, reducing checkout abandonment by 20%

EDUCATION

Bachelor of Engineering in Software Engineering

Oct. 2020 – Jul. 2024

NED University of Engineering & Technology

Karachi, Pakistan

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, PHP

Technologies: React, React Native, Next.js, Node.js, Express.js, NestJS, Laravel, HTML, CSS

Databases: MongoDB, PostgreSQL, MySQL, DynamoDB, WatermelonDB, Firebase, Supabase

Cloud Platforms: AWS, Microsoft Azure, GCP

AI & GenAI: OpenAI API, Anthropic Claude API, LangChain, RAG, Vector Databases (Pinecone, pgvector), Prompt Engineering, Vercel AI SDK, Hugging Face

DevOps & Tools: Docker, Kubernetes, Terraform, Helm, GitHub Actions (CI/CD)-, Nginx, Prometheus, Grafana, Git

CERTIFICATIONS

- Agile Software Development** – University of Minnesota (Sep. 2024)
- Developing Back-End Apps with Node.js and Express** – IBM (May 2023)
- Front-End Web Development with React** – Coursera (Jan. 2023)
