SUMMARY

Backend-focused Software Engineer with 5+ years of experience building scalable services, APIs, and cloud infrastructure using TypeScript, Node.js, NestJS, and AWS. Experienced in backend architecture, database design, API integrations, AI/GenAI systems, and translating ambiguous requirements into production-ready solutions with strong focus on scalability, reliability, performance, and maintainability.

EDUCATION

Bachelor of Engineering in Software Engineering

NED University of Engineering & Technology

SKILLS

Languages: TypeScript, JavaScript, Python, Java, PHP

Backend: Node.js, NestJS, Express.js, REST APIs, GraphQL, Microservices, API Design

Databases: PostgreSQL, MongoDB, MySQL, DynamoDB, Firebase, Supabase

Cloud & Infrastructure: AWS, Azure, GCP, Docker, Kubernetes, Terraform, Helm, Nginx

AI & GenAI: OpenAI API, Anthropic Claude API, LangChain, RAG, Pinecone, pgvector, Prompt Engineering

DevOps & Tools: GitHub Actions, Prometheus, Grafana, Git, Automated Testing

EXPERIENCE

Senior Software Engineer

Apr. 2025 – Present

EpicMetry

Remote

- Own backend architecture for Al Rais, designing AWS Lambda services and REST APIs for hotels, flights, activities, bookings, cart, and account
- Define service boundaries, API contracts, business logic, and data flows with focus on scalability, maintainability, and reliability
- Architect serverless infrastructure on AWS and make technical decisions for evolving product requirements
- Led TradeSocial modernization, improving backend architecture and APIs while reducing technical debt by 40%
- Drive engineering standards through code reviews, technical interviews, mentoring, and architecture decisions

Software Engineer

Nov. 2024 – May 2025

Centrox AI

Islamabad, Pakistan (Hybrid)

- Led CreditBase backend development using NestJS, TypeScript, and MongoDB, integrating Anthropic Claude for LLM-powered legal document parsing and comparison
- Designed AI document-processing workflows that reduced complex legal document analysis time by 60%
- Delivered 4+ features for Pocket Mate AI, leveraging OpenAI API and prompt engineering to enhance conversational performance and user experience for 500+ daily active users
- Resolved 40+ critical issues across NestJS, Next.js, and MongoDB, improving uptime to 99.2% and latency by 35%

Associate Software Engineer

Dec. 2023 – Mar. 2024

Ephlux

Karachi, Pakistan (Hybrid)

- Maintained backend services for a no-code enterprise platform serving 4,000+ users using Node.js and Express.js across 5+ modules
- Resolved 20+ complex platform issues, reducing ticket resolution time by 50%

Junior Full Stack Developer

Sep. 2020 – Oct. 2023

IANCON

Remote

- Developed backend services and buyer/seller workflows for Noonhut, supporting 100+ vendors and 500+ daily orders
- Implemented Firebase authentication and real-time data services, reducing checkout abandonment by 20%

CERTIFICATIONS

- Software Engineer** – HackerRank
- Developing Back-End Apps with Node.js and Express** – IBM
- Introduction to MongoDB** – MongoDB
